

Hi my name is Finn Caldecoat, I am 10 years of age and have spent 6 years here on Portland and have countless ^{Joyfull} memories here. Your incinerator would burn for 40 years. ^{by 40 years} ~~spend~~ months of destruction, see Portland is a special place and I'm not just saying that

If there are species ~~se~~ here that only live here no where else in the whole wide world lock it up! ~~It's not just them still don't~~ stop you the fact that Portland is a special type of ^{land} ~~land~~. The grasslands here are only seen in a few ^{if that's next} ~~enough to~~

different environments - once again in the whole wide world. That then also allows ~~special~~ species of high variety to live

here. ~~And the fly ash being added~~ Portland is a very poor community one of the poorest in the UK people living

here will lose ^{put} ~~it all~~ from the value of houses dropping ~~massively~~ massively. They already are struggling

with economic prices and can not nearly afford to move away. This will force the people to have to live

with the toxins they will consume from breathing. This will cause illness and ~~all different types of cancer~~

Cancer.

My house is ~~1000m~~^{1000m} away from the where the
~~incinerator~~ incinerator would be built. My house is also 70m
above sea level the incinerator's ~~would~~ top would
be 80m that's a 10m difference. Now I have
a question to the company planning to build
this why not build this on one of your fine
acres of land? How would you like an incinerator
on your door step say no the that well we say
no + to this! We need to ~~recycle~~ recycle ^{and} not burn
fine resources. We ~~need~~ want no incinerator in Dorset.

~~No incinerators in the UK.~~ No more incinerators in
~~more~~

the UK. I ~~we~~ have said it once and will say it again.

My name is Finn Caldwell I am 10 years old and
am in year 6 at Atlantic Academy Portland and am a
student leader. Head of my House castle cove. And
I say No to the incinerator.
