

Weymouth Neighbourhood Plan
Landscape and Green Spaces Theme

| Draft Aims and Objectives | |
|------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Aims | Objectives |
| Aim 13. Preserve and enhance our unique environments and sustain distinctive landscapes and coastline | <ul style="list-style-type: none"> • identify and protect key locations and special habitats • promote development that complements and enhances the landscape and coastline character. • support required flood resilience measures. • facilitate responsible public access to the countryside and coastline. |
| Aim 14. Increase the use of Weymouth’s open spaces and community facilities | <ul style="list-style-type: none"> • identify and protect local green spaces • ensure recreational spaces are sufficient to meet local demands • protect important green gaps between settlement areas • provide sufficient areas of green space within new developments • meet or exceed standards for play spaces and sports pitches • support improvements and enhancements to existing recreation and sports facilities that help ensure all needs are met |
| Aim 15. Encourage engagement with nature, enhance biodiversity and habitat conservation, and invest in our natural capital and our ecosystems | <ul style="list-style-type: none"> • protect and enhance biodiversity • protect wildlife habitats and the key landscape features and characteristics • protect existing and promote the provision of native tree and hedge species in new developments • support sustainable local food production • protect existing allotments and support new allotments that meet a local demand • improve and extend green infrastructure |
| Aim 16. Create an integrated network of green and blue infrastructure habitats, parks, waterways, and nature trails | <ul style="list-style-type: none"> • create and enhance green linkages between neighbourhoods and developed areas • provide a network of interconnected and accessible pedestrian and cycle routes |
