

Note of Environmentally Sensitive Sites in Wool Parish to Inform SEA and HRA Considerations in the Development of Wool Parish Neighbourhood Plan

1. This document sets information relevant to the screening of the neighbourhood plan for potentially significant effects on sensitive ecological sites and other sensitive sites, with reference to habitat regulations assessment requirements and strategic environmental assessment requirements.

Habitat features

2. There are a number of ecologically sensitive sites located within and just outside the boundary of Wool Parish. These are shown on Figure 1 and Table 1. The north of the parish is the location for the extensive Turners Puddle Heath Site of Special Scientific Interest (SSSI) and much of this site is also a designated Ramsar Site (part of a much larger designation) designated for its importance as a lowland wet heathland. The centre of the parish is bisected by the River Frome which runs west to east through the area and which is designated as a SSSI. A further small SSSI is located at the far western end of the parish at Winfrith Heath. Extensive areas of Dorset Heaths Special Protection Area and Special Area of Conservation lie just outside the boundaries of the parish to the west and to the east, with heathland buffer zones located within the parish.

Heritage Assets

- Wool Parish contains 60 Listed Buildings, of which 59 are Grade II Listed Building and three are Grade II* buildings and structures (The Parish Church of the Holy Rood, Bindon Abbey and The Gatehouse at Bindon Abbey). The Grade II* listed Wool Bridge is located within East Stoke adjacent to the boundary with Wool Parish and on the only pedestrian and cycle route from Wool to Bovington. Listed Buildings are clustered in Wool Conservation Area, Giddy Green/East Burton Village and at Bindon Abbey/Bindon Mill. The location of listed buildings, scheduled monuments and the Wool Conservation Area are shown located within the parish in Figure 2. Individual heritage assets are listed in Table 2.

Other sensitive sites

4. A significant part of the east of Wool Parish is designated Dorset Area of Outstanding Natural Beauty (AONB) and the southern edge of the parish forms the border of the AONB. Development of land within Wool Parish therefore has the potential to create direct effects within the AONB and on the setting of the AONB from outside. Figure 3 shows the extent of AONB within the Parish.

Flood Risk

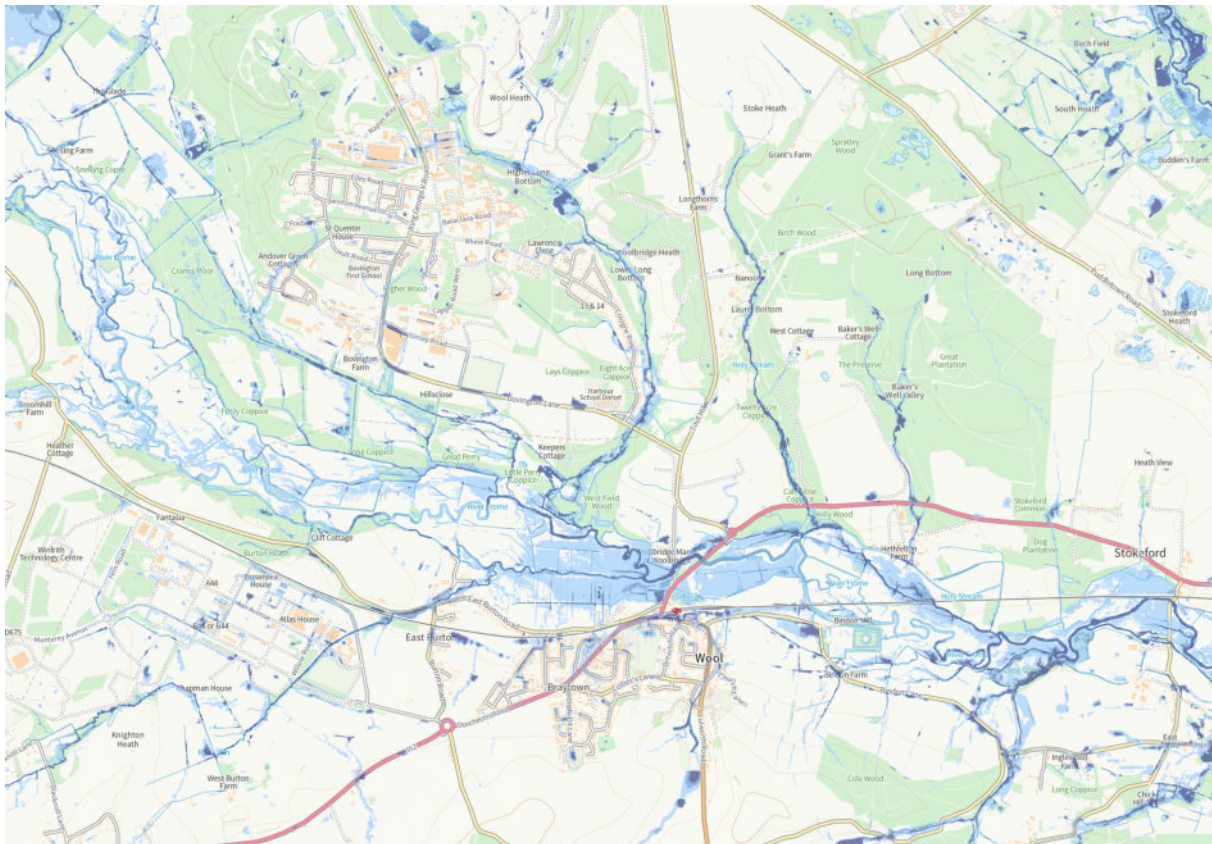

5. Figure 4 shows the areas of the parish located within Flood Zone 2 and Flood Zone 3 flood risk from rivers and the sea. Figure 5 shows the extent of very local to high levels of risk of flooding from surface waters.

Habitats Regulations Assessment – Screening Considerations

- 6. Regulation 106 of the Conservation of Habitats and Species Regulations 2017 (the ‘Habitats Regulations’), provides screening criteria to inform whether the assessment under Regulation 105 is required. Consideration should be given to the potential for the neighbourhood plan to result in significant effects on the above European Sites, associated with the matters set out below:

CRITERIA
Physical loss or damage to habitat.
Non-physical disturbance e.g. noise, vibration or light pollution.
Air pollution.
Increased recreational pressures.
Changes to hydrological regimes such water quantity and water quality.
In-combination effects

Strategic Environment Appraisal – Screening Considerations

- 7. Neighbourhood plans only require SEA where they are likely to lead to significant environmental effects. To decide whether a proposed neighbourhood plan is likely to have significant environmental effects, it should be screened against the criteria set out in Annex 2 of the SEA Directive, set out below.

CRITERIA
The criteria relate to the characteristics of the plan, having regard to:
(a) the degree to which the plan sets a framework for projects and other activities, either with regard to the location, nature, size and operating conditions or by allocating resources.
(b) the degree to which the plan influences other plans and programmes including those in a hierarchy.
(c) the relevance of the plan for the integration of environmental considerations, in particular with a view to promoting sustainable development.
(d) environmental problems relevant to the plan
(e) the relevance of the plan for the implementation of Community legislation on the environment (e.g. plans and programmes linked to waste management or water protection).
The criteria also relate to the characteristics of the effects and of the area likely to be affected, having regard to:
(a) the probability, duration, frequency and reversibility of the effects.
(b) the cumulative nature of the effects
(c) the transboundary nature of the effects
(d) the risks to human health or the environment.
(e) the magnitude and spatial extent of the effects (geographical area and size of the population likely to be affected).
(f) the value and vulnerability of the area likely to be affected due to: <ul style="list-style-type: none"> • special natural characteristics or cultural heritage; • exceeded environmental quality standards or limit values; • intensive land-use; • the effects on areas or landscapes which have a recognised national, Community or international protection status

8. The screening criteria also relate to the consideration of likely significant effects, using the criteria from Schedule 1 and Schedule 2 of the SEA Regulations for each of the SEA issues:

CRITERIA
Biodiversity, flora and fauna
Population
Human health
Soil
Water
Air
Climatic factors
Material assets
